

EDWIN et al.
Appl. No. 10/507,493
December 5, 2005

REMARKS/ARGUMENTS

Claims 1-13 are present in this application. By this Supplemental Amendment, the specification and claims 1 and 11 have been amended to clarify that the circumferential distance referenced in the claims is the circumferential distance between the detector and each one of the rotatable members of the guides.

The Remarks submitted in the Amendment filed October 19, 2005 are reasserted herein with the noted clarification. That is, the cited Baresh patent lacks at least the feature where a circumferential distance between each said rotatable member and the detector is smaller than a radius of the arc over which the rotatable members and the detector are positioned.

For these reasons and those set forth in the Amendment filed October 19, 2005, Applicants respectfully submit that the application is in condition for allowance. Prompt passage to issuance is solicited.

Respectfully submitted,

NIXON & VANDERHYE P.C.
